FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

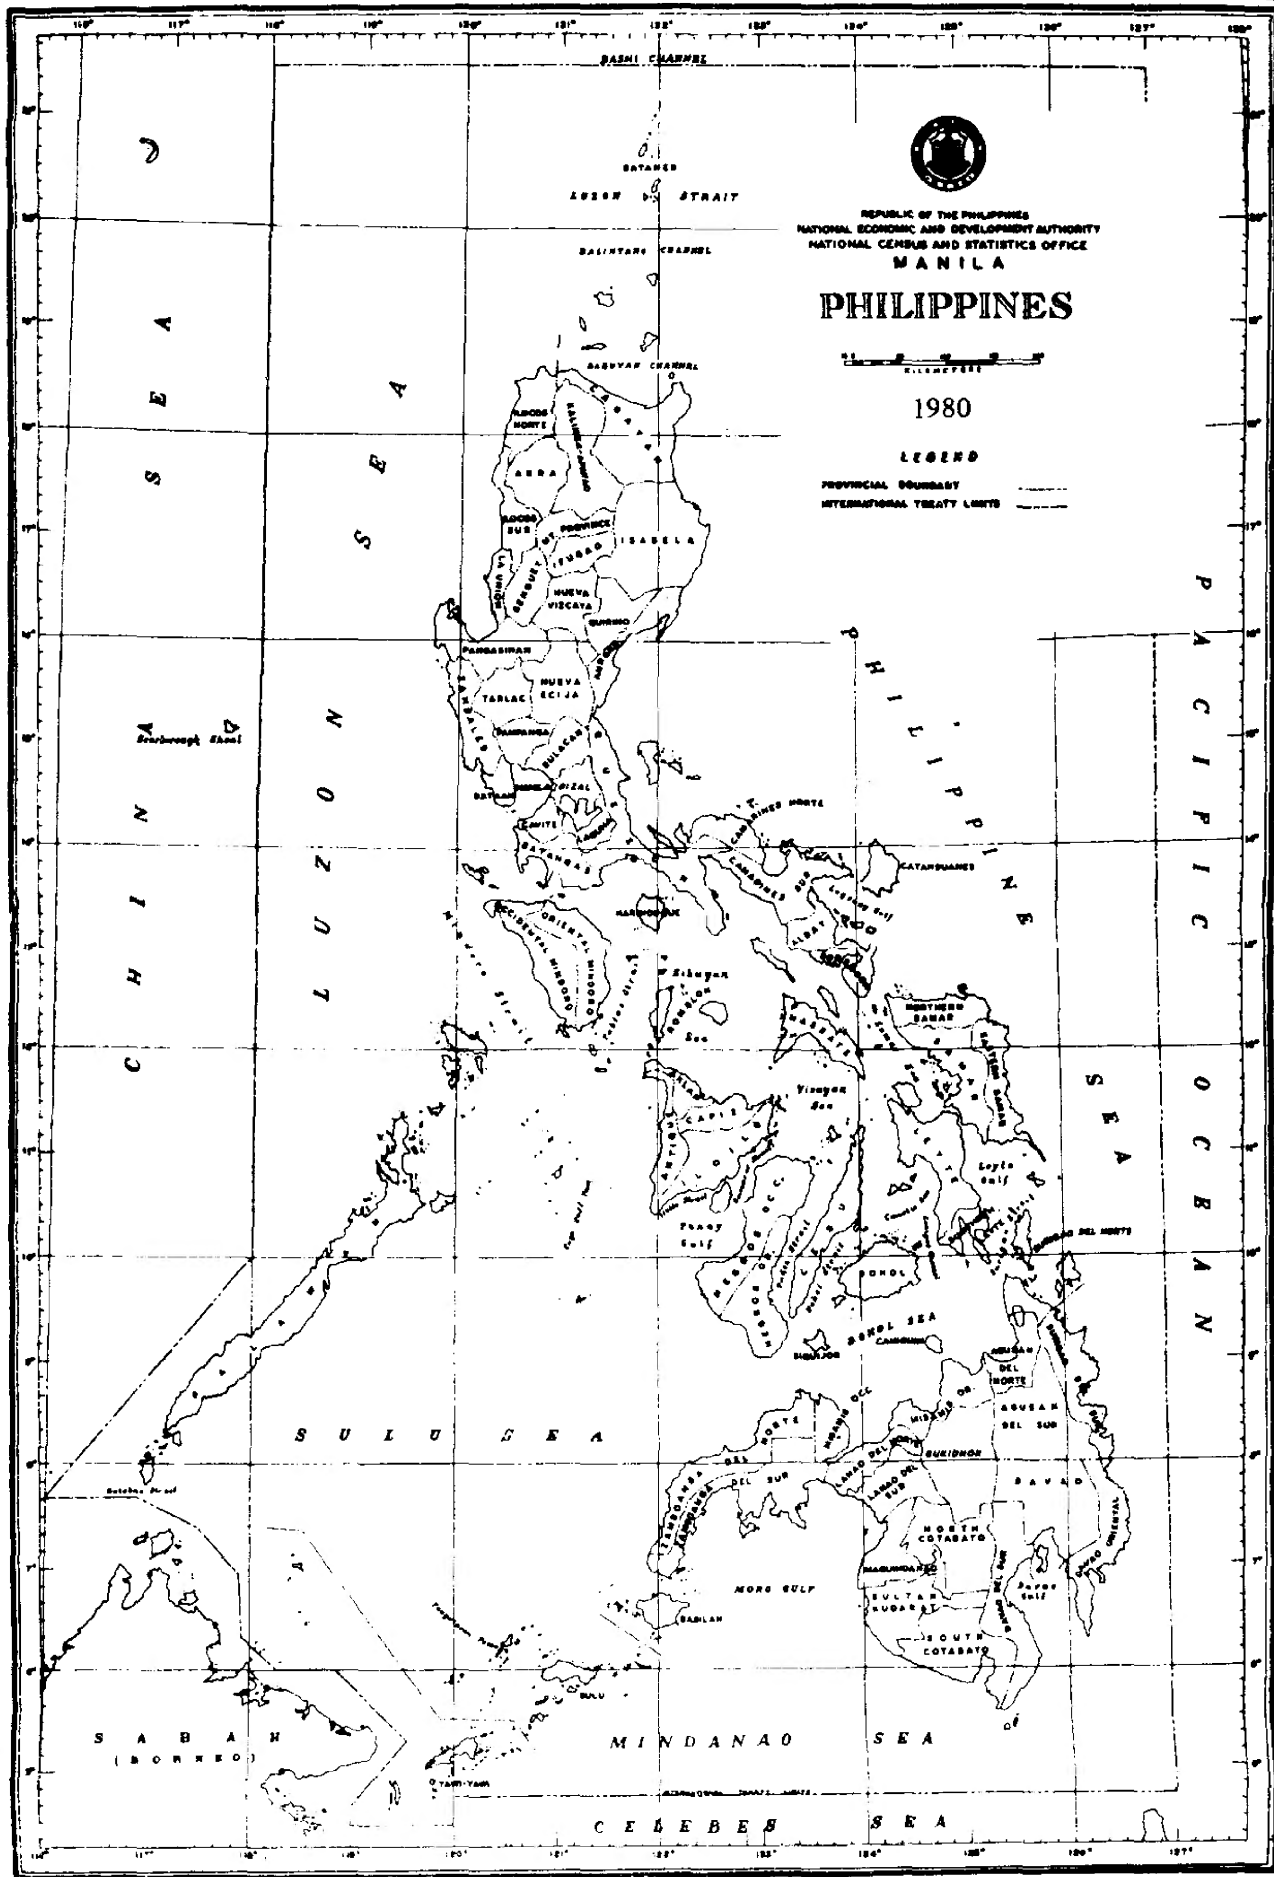

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

EXPLANATORY TEXT

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

EXPLANATORY TEXT

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I – POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

EXPLANATORY TEXT

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

EXPLANATORY TEXT

- or within one year, if abroad;
 - b. students who usually go home to their respective households at least once a week;
 - c. persons working elsewhere who usually go home to their respective households at least once a week;
 - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
 - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
 - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
 - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
 - 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
 - 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
 - 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
 - 7. Persons found in the household who have no usual place of residence elsewhere;
 - 8. Persons found in the household who are not certain of being enumerated elsewhere;
 - 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
 - 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
 - 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
 - 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

EXPLANATORY TEXT

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

EXPLANATORY TEXT

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

EXPLANATORY TEXT

3. Son-in-law/daughter-in-law — refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter — child of the son or daughter of the head.
5. Other relative — a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others — any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single — If never been married.
- b. Married — Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed — A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated — If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced — If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown — If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II – HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. **Single house** – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. **Duplex** – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. **Apartment/accesoria/condominium/row house**
An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.
An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.
A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.
4. **Improvised (barong-barong)** – a makeshift or roughly constructed house usually built with salvaged materials.
5. **Commercial/industrial/agricultural** – buildings not intended for human habitation but used as dwelling units at the time of the census.
Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.
Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.
Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.
6. **Other housing unit (natural shelter, boat, etc.)**
This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.
7. **Hotel, lodging house, dormitory, etc.** – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. **Institutional (hospital/convent/school dormitory/penal institution, etc.)** – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. **Other collective living quarters** – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

EXPLANATORY TEXT

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

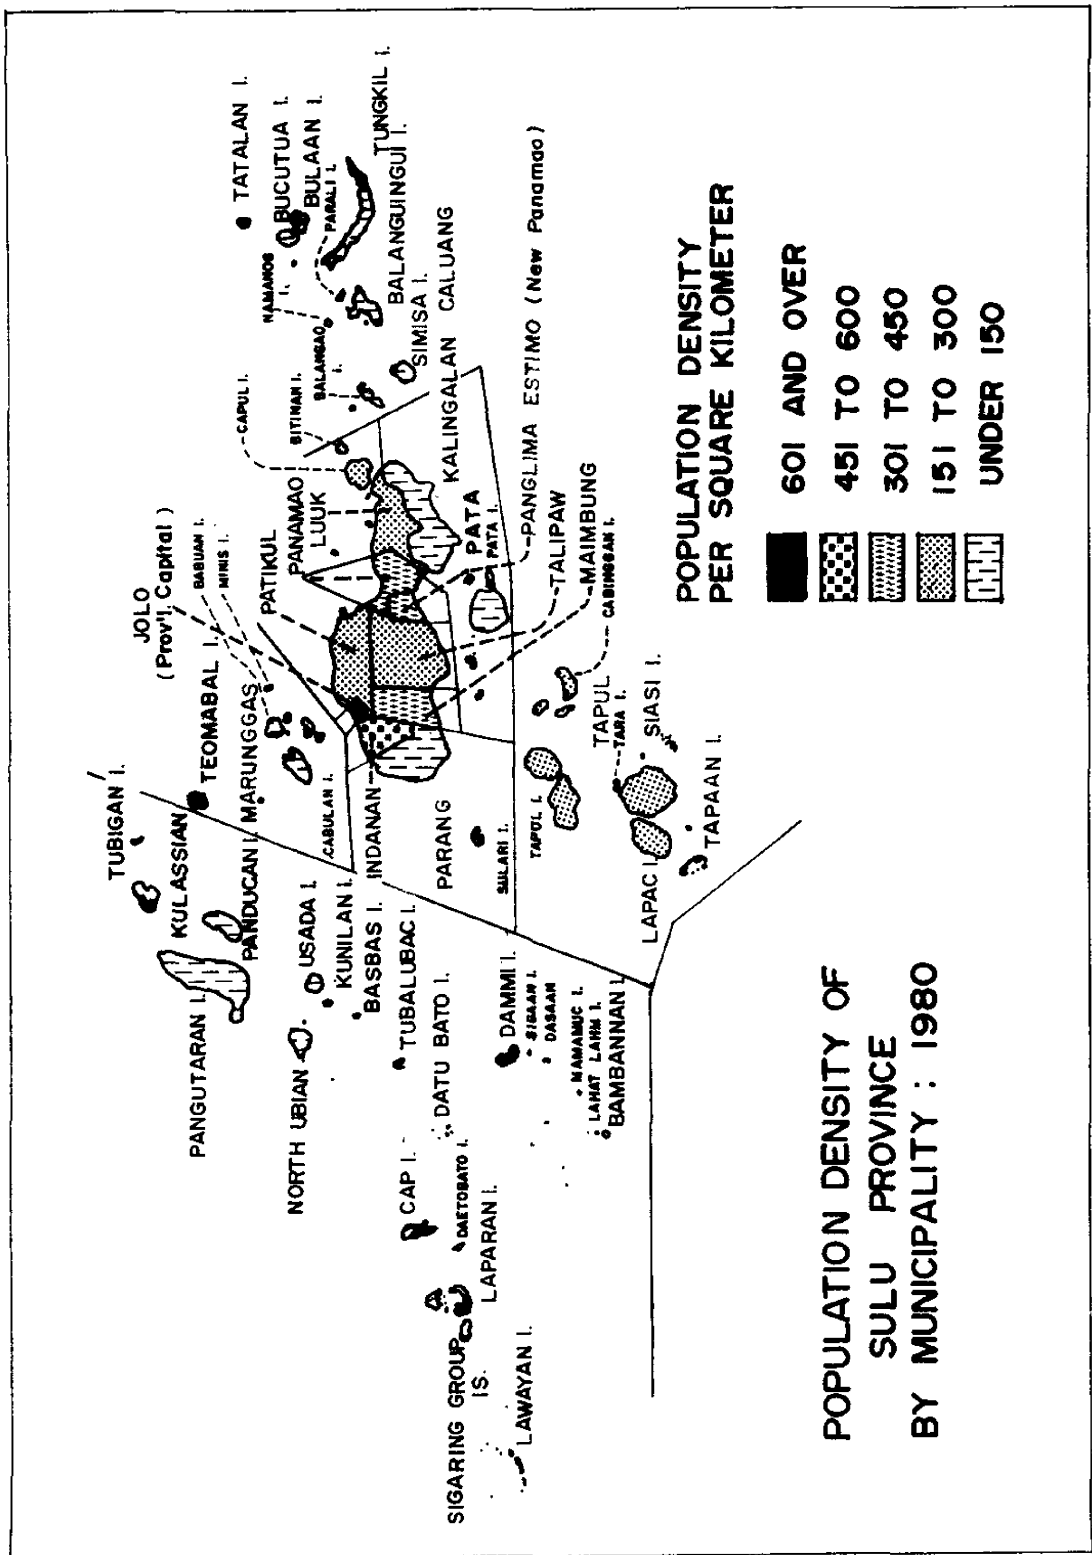

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

EXPLANATORY TEXT

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

Sulu: A Brief Analysis

The province of Sulu lies approximately midway between Basilan and Tawi-Tawi, surrounded by the Sulu and Mindanao Seas on the west and north, and the Celebes Sea on the east.

Over 157 islands and islets compose the province. These are divided into four groups – Jolo group, Pangutaran group, Tongkil-Banguingi group (Samales) and the Siasi-Tapul group.

The islands have a varied terrain. Jolo, the main island, is mountainous while Siasi has a hilly interior. Both are of volcanic origin. Sulu has few protected harbors, all located in Jolo and Siasi. The other islands such as Pangutaran are of coral formation, resulting in low, swampy, flat, and forested areas. However, numerous places around the reef-surrounded islands afford anchorages.

Sulu occupies a land area of 1,600.4 square kilometers, representing 0.53 percent of the country's total land area.

Sixteen municipalities constitute the province with Jolo as the capital.

POPULATION

As of May 1, 1980, Sulu had 360,588 residents of which 179,729 were males and 180,859 were females. In terms of population size, the province ranked number 47 among the 73 provinces of the country. The population density of the province moved up from 150.0 persons per square kilometer in 1975 to 225.3 in 1980, a considerable increase of 75.3 persons per square kilometer. The population figure also put the annual geometric growth rate of the population at 8.48 percent.

Sulu is still predominantly rural. More than four-fifths (81.82%) of its population dwell in the rural areas and only 18.18 percent, in the urban areas. Compared to the 1975 data, the urban proportion slightly increased by 0.12 percentage point.

A comparative breakdown of the population classified according to urban-rural residence and sex is shown in Table A.

A BRIEF ANALYSIS

Male	148,212	41.10	99,872	41.61
Female	146,817	40.72	96,797	40.33

A BRIEF ANALYSIS

The sex ratio (number of males for every 100 females) of the province went down from 101.87 in 1975 to 99.38 in 1980. More males than females were found in the rural areas where a sex ratio of 100.95 was recorded, but females outnumbered males in urban areas where there were only 92.58 males for every 100 females.

Figure 1 presents the 1980 proportions of males and females, urban and rural, in five-year age groups to the total population. As seen in the diagram, the rural and urban sectors deviate from the usual pyramid population structure, characterized by declining percentages of males and females as the age group becomes older. In the urban areas, males 25-29 years old outnumber those 20-24 years old. On the other hand, females 15-19 years of age exceed those in the 10-14 age group. In the rural areas, both males and females below five years old are outnumbered by those 5-9 years; the 20-24, by those 25-29 years and the 30-34, by those 35-39 years old.

AGE COMPOSITION

Sulu still has a high proportion of persons in the younger age group (0-14 years) with the trend going up since 1975. The 0-14 age group comprises 45.91 percent of the provincial total, or an increase of 4.02 percentage points between 1975 and 1980. On the other hand, the proportion of the productive age group (15-64 years old) is on a downward swing; from 56.72 percent in 1975, it went down by 3.76 percentage points to 52.96 percent. The older age group (65 years and over) constitutes a small proportion of the provincial population (1.13%), registering a decrease of 0.26 percentage point within the five-year period.

Below are comparative figures showing the age composition of the population in two censal years:

**TABLE B – AGE COMPOSITION OF THE POPULATION,
SULU: 1975 AND 1980**

Age Composition	1980		1975	
	Number	Percent	Number	Percent
Total	<u>360,588</u>	<u>100.00</u>	<u>240,001</u>	<u>100.00</u>
0 - 14 years	165,528	45.91	100,532	41.89
15 - 64 years	<u>190,971</u>	52.96	136,133	56.72
65 years and over	4,089	1.13	3,336	1.39

The median age of the population is 16 years; half of the population are below 16 years old and the other half, above this age. The median age is a year younger than that in 1975, indicating that the population is getting younger.

With the decrease in the proportion of persons in the productive age group, the dependency ratio (number of dependents for every 100 persons in the productive age group) rose from 76.30 in 1975 to 88.82 in 1980. Comparatively, the urban dependency ratio was lower than the rural ratio, 79.85 for the former and 90.93 for the latter. Of the total urban population, 42.88 percent are below 15 years old; 55.60 percent are in the productive age bracket; and only 1.52 percent, 65 years and over. Among the rural residents, 46.58 percent are 0-14 years old; 52.37 percent, 15-64; and 1.05 percent, 65 years and over.

A BRIEF ANALYSIS

MARITAL STATUS

A marked decrease of 5.35 percentage points in the proportion of never married persons who consequently comprised 46.65 percent of the total population 10 years old and over was noted. Considerable increases of 3.74 and 1.18 percentage points were respectively registered by married and widowed persons, from 43.44 percent in 1975 to 47.18 percent in 1980 for the married and from 3.77 percent to 4.95 percent for the widowed. Similarly, slight increases were posted by those divorced or separated (from 0.77% to 1.16%) and those who did not reveal their status (from 0.02% to 0.06%). Among the urban dwellers never married persons totalled 44.08 percent and their rural counterparts, 47.23 percent. Married persons constituted 48.68 percent of the urban residents, greater in proportion than their rural counterparts (46.84%).

Almost half (48.92%) of the males 10 years old and over were single, lower by 5.53 percentage points than the 1975 proportion. Married males, on the other hand, increased by 4.82 percentage points (from 42.93% to 47.75%). The widowed, divorced or separated upped, respectively, to 2.43 percent and 0.83 percent. Among the females, 44.42 percent were single, following a considerable decrease of 5.13 percentage points from the 1975 figure.

A BRIEF ANALYSIS

Married females, however, hiked from 43.95 percent in 1975 to 46.61 percent in 1980. Those widowed accelerated to 7.42 percent and those divorced or separated, to 1.50 percent. For those who did not disclose their status, males (0.07%) slightly outnumbered the females (0.05%).

Table C and Figure 2 show the classification of the population by sex and marital status.

A BRIEF ANALYSIS

HIGHEST GRADE COMPLETED

More than half (58.52%) of the private household population seven years old and over in Sulu did not complete any grade, 11.30 percentage points higher than the 1975 proportion. Persons who finished at least a year of elementary schooling went up by 2.43 percentage points to 28.91 percent. The rest incurred losses in their respective proportions. Those who reached secondary and college levels decreased respectively by 4.13 and 1.08 percentage points. Academic degree holders dropped from 1.41 percent to 1.26 percent and those who did not reveal their educational attainment, from 8.62 percent to 0.25 percent.

Of those with elementary education, 50.80 percent finished at least the first grade but not higher than the third grade; 16.92 percent completed the fourth grade; 10.67 percent, the fifth grade and 21.61 percent graduated from the sixth or seventh grade. Among those with secondary education, 73.65 percent finished at most the third year while 26.35 percent graduated from the fourth year. Majority of the college undergraduates (78.80%) finished the lower collegiate years (first to third year) while 21.20 percent completed the fourth or higher years (Table 5).

The following table shows the distribution of the private household population according to highest grade completed in the last two censal years:

LITERACY

Sulu registered a very low literacy rate with only 32.37 percent of the total private household population aged 10 and over, able to read and write. Urban literates (60.13%) were higher in proportion than the rural literates (26.06%). The males outstripped the females in literacy rate, 35.60 percent against 29.27 percent. In both urban and rural areas, the males registered higher rates than their female counterparts – 66.04 percent and 28.99 percent, respectively, for the males compared to 54.86 percent and 23.21 percent, respectively, for the females.

A BRIEF ANALYSIS

LANGUAGE OR DIALECT

Sulu-Moro (Tausog) is generally spoken in the province. Of the 58,756 private households, 50,905 or 86.64 percent speak the dialect. Urban and rural areas are both predominated by Tausog-speaking households, 92.69 percent and 85.28 percent, respectively. Samal is spoken by 12.05 percent; Tagalog, 0.42 percent; Badjao, 0.15 percent and Cebuano, 0.14 percent. The remaining 0.60 percent speak one of several other languages and dialects reported for the province.

A BRIEF ANALYSIS

GAINFUL OCCUPATION

For private household persons 15 years old and over, 51.83 percent are gainful workers while 48.17 percent are engaged in non-gainful activities.

The number of gainful workers has increased to 99,246 from the 1975 report of 65,869. Agricultural, animal husbandry and forestry workers, fishermen and hunters make up 76.64 percent of all gainful workers, 6.35 percentage points higher than in 1975. Production and related workers, transport equipment operators and laborers increased by 1.21 percentage points to 10.47 percent, retaining their hold of second place. Sales workers decreased by 5.13 percentage points to 4.31 percent. Meanwhile, service workers increased by 0.51 percentage point to 3.46 percent, displacing professional, technical and related workers which slightly declined from 4.26 percent to 3.26 percent. Clerical and related workers at merely 0.93 percent, likewise, decreased by 0.22 percentage point. Administrative, executive and managerial workers at 0.15 percent, comprise the smallest group of gainful workers. Workers with unclassifiable occupation total 0.78 percent.

The following table reflects the changes in the proportion of workers engaged in various gainful occupations:

**TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER

INDUSTRY

Agriculture, fishery and forestry, the predominating industry group in the province, provide work to more than three-fourths (77.04%) of the total gainful workers 15 years old and over. Majority of the agricultural workers derive their income from agricultural crop production (69.33%) and nearly thirty percent, from fishery (29.82%). Community, social and personal services, combining for 7.26 percent, rank second. The three leading sources of jobs in this group are education services (38.10%), public administration and defense (29.40%), and personal and household services (25.73%). Manufacturing, ranking third, employs 6.22 percent of the gainful workers whose chief concentration is in the manufacture of textile, wearing apparel and leather (93.25%). Wholesale and retail trade contribute 4.45 percent; transportation, storage and communication, 2.33 percent; construction, 1.44 percent; financing, insurance, real estate and business services, 0.54 percent; electricity, gas and water, 0.10 percent; mining and quarrying, 0.02 percent and activities not adequately defined, 0.60 percent.

A BRIEF ANALYSIS

FIG. 6 – GAINFUL WORKERS 15 YEARS OLD AND OVER
BY MAJOR INDUSTRY GROUP, SULU: 1980

MIGRATION

Out of 304,005 persons 5 years old and over in private households, 96.71 percent were residents of the same municipality where they had lived on May 1, 1975. Of the 10,008 persons or 3.29 percent who had a different place of residence on May 1, 1975, 2.74 percent moved to another municipality within their home province while only 0.50 percent moved across provincial boundaries. Only a very small proportion of the population resided in foreign countries (0.05%). In the intra-provincial migration and migration to foreign countries, there were more females than males (1.43% females against 1.31% males and 0.03% females against 0.02% males, respectively). On the other hand, the same proportion of males and females migrated to another province (0.25%).

A BRIEF ANALYSIS

TYPE OF BUILDING

A great majority (98.10%) of the 58,756 households occupy single houses. The rest live either in duplex (0.51%), apartment/accesoria/condominium/row house/etc. (0.05%), improvised structures or barong-barong (0.94%), commercial/industrial/agricultural buildings (0.36%), other housing unit such as natural shelter, boat, etc. (0.02%), and institutional buildings such as hospital, convent, school dormitory, etc. (0.01%).

Most of the households occupying single houses are in the rural areas (82.29%); only 17.71 percent are in the urban areas. On the other hand, more duplex (61.26%), apartment/accesoria/condominium/row house (82.87%) and commercial/industrial/agricultural building (74.29%) occupants are from the urban areas.

TYPE OF OCCUPANCY

Out of 58,756 households in Sulu, 89.80 percent are owners of their dwelling units. The rest are either tenants/lessees (5.13%), subtenants/sublessees (0.38%) or rent-free occupants (4.69%).

In the urban areas, 78.16 percent are owners of their dwelling units. The remaining 21.84 percent are distributed as follows: 9.36 percent, tenants or lessees; 0.60 percent, subtenants or sublessees; and 11.88 percent, rent-free occupants. In the rural areas, the respective proportions are 92.40 percent, 4.19 percent, 0.33 percent, and 3.08 percent (Table 1).

A BRIEF ANALYSIS

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Most of the households (89.69%) in the province occupy dwelling units constructed with roofs of light materials such as cogon or nipa, makeshift or salvaged materials and others such as anahaw. One-tenth (10.31%) dwell in units with roofs of strong materials such as galvanized iron/aluminum, tile, concrete, brick, stone, and asbestos.

Households occupying dwelling units with roof of light materials are common in both the urban (78.61%) and rural (92.17%) areas. Those residing in units with roof of strong materials make up 21.39 percent in the urban and 7.83 percent in the rural areas.

By type of construction materials of outer walls, 87.27 percent of the households occupy units built with walls of light materials (bamboo/sawali, cogon/nipa, makeshift/salvaged materials and others). Only 12.73 percent reside in units with walls of strong materials. Most of the households in both the urban (77.89%) and the rural (89.37%) areas reside in dwelling units with outer walls of light materials. Households living in dwelling units with walls of strong materials (galvanized iron/aluminum, tile/concrete/brick/stone, wood/plywood, mixed tile/concrete/brick/stone and wood/plywood, and asbestos) comprise 22.11 percent in the urban and 10.63 percent in rural areas (Table 2).

YEAR BUILT

Nearly two-thirds or 64.73 percent of the total households are occupants of structures built in 1976-1980; 19.79 percent, in 1971-1975; 9.86 percent, 1961-1970; and 4.33 percent, 1951-1960. Very few (0.77%) live in buildings constructed during 1942-1950 and only 0.52 percent, before World War II (Table 2).

FLOOR AREA OF DWELLING UNIT

Of the 58,756 households in Sulu, 55.78 percent occupy dwelling units with floor area less than 30 square meters. About 31.80 percent live in 30-49 square-meter dwelling units; 6.00 percent dwell in 50-69 square-meter units and 3.13 percent, 70-99 square meters. Only 3.29 percent have spacious dwelling units from 100 square meters and over (Table 3).

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Over three-fifths (62.48%) of the households that own the dwelling units they occupy also own the land where the structures are erected. The rest are distributed as follows: 4.92 percent, lessee or sublessee; 5.23 percent, farm lessee or agricultural tenant of landowner; 4.24 percent, other legal tenure; and 23.13 percent, no tenure such as squatters (Table 4).

SOURCE AND USE OF WATER SUPPLY

More than half of the total number of households depend largely on the dug well as a source of water supply for drinking (53.40%), for kitchen use (54.16%) and for washing clothes (53.31%). The rest of the households use water from the faucet, community water system for drinking (22.19%); 10.51 percent depend on lake, river, stream, etc.; 8.51 percent, spring; 2.56 percent, tubed or piped deep well; 1.50 percent, tubed or piped shallow well and 1.33 percent, rain. Almost the same proportions of households utilize water from these sources for kitchen use: 20.57 percent, faucet, community water system; 11.46 percent, lake, river, stream, etc.; 8.54 percent, spring; 2.02 percent, rain; 1.91 percent, tubed or piped deep well; and 1.34 percent, tubed or piped shallow well. For washing clothes, 18.97 percent use water from faucet, community water system; 12.98 percent from lake, river, stream, etc.; and 8.22 percent, spring. Few households use water from rain (3.42%), tubed or piped deep well (1.70%) and tubed or piped shallow well (1.40%). (See Table 6.)

A BRIEF ANALYSIS

KIND OF LIGHTING FACILITIES

Kerosene is the most predominant type of lighting with 92.76 percent of the total households using it. Others depend on electricity (4.07%), liquefied petroleum gas (2.15%), oil (0.20%), or other kinds (0.82%). A greater proportion of the rural households (95.95%) use kerosene compared to the urban households (78.52%). More urban households (18.80%) use electricity for lighting, compared to rural dwellers with only 0.77 percent (Table 5).

COOKING FUEL

Wood or charcoal is still the most commonly used kind of cooking fuel in Sulu. An aggregate of 83.51 percent use wood or charcoal for cooking. The remaining 16.49 percent use either kerosene (14.04%), liquefied petroleum gas (0.91%), electricity (0.21%) or other kinds (1.33%). In both urban and rural areas, the predominant use of wood or charcoal is observed (83.22% of the total urban households and 83.58% of the total rural households). (See Table 8.)

TOILET FACILITIES

The most common type of toilet facility in the province is the open pit, with 51.38 percent of the total households using it. Over one-tenth (11.49%) use the closed pit (antipolo, etc.); 4.79 percent, water-sealed with other depository; 3.85 percent, water-sealed with sewer or septic tank; and 7.86 percent, other (pail system, etc.). Households without toilet facilities constitute 20.63 percent.

Among the urban households, 35.45 percent use the open pit; 16.00 percent, closed pit; 9.87 percent, water-sealed with sewer or septic tank; 9.90 percent, water-sealed with other depository; and 6.98 percent, other types. In comparison, 54.95 percent of the rural households use the open pit; 10.48 percent, closed pit; 3.65 percent, water-sealed with other depository; 2.50 percent, water-sealed with sewer or septic tank; and 8.05 percent, other types. Urban and rural households without toilet facilities make up 21.80 percent and 20.37 percent, respectively (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

More than one-third (34.39%) of the total number of households have radios; only 0.83 percent own television sets and 1.81 percent, refrigerators or freezers. Among the rural households, 31.83 percent have radios; 0.40 percent own television sets and 1.26 percent, refrigerators or freezers. On the other hand, 45.85 percent of the urban households own radios; 2.77 percent have television sets and 4.27 percent, refrigerators or freezers.
